

When to propose an oncogenetic consultation

Genealogical tree analysis according to the Eisinger score

Add up the scores for each branch of the family

To calculate the Eisinger score, the scores must be added up for each case of the same parental branch

BRCA1/2 mutation identified in the family	5	Results <ul style="list-style-type: none">○ 3 or + : oncogenetic consultation○ less than 3 : organized screening
Breast cancer for a woman before the age of 30	4	
Breast cancer for a woman between 30 and 39 years old	3	
Breast cancer for a woman between 40 and 49 years old	2	
Breast cancer for a woman between 50 and 70 years old	1	
Breast cancer for a man	4	
Ovarian cancer before 70 years old	4	

Score >3

Oncogenetic consultation

Score <3

Annual clinical examination from the age of 25
Screening from the age of 50
